Objective

Energetic Full-Stack Developer (MERN) , seeking a career which is intellectually challenging, financially rewarding offering excellent opportunities for advancement. Adept at contributing to a highly collaborative work environment, finding solutions and determining customer satisfactions.

Projects

- **PORTFOLIO**

- Personal website made using using html, css & vanilla javascript as frontend with responsiveness on all devices.
- Contact-form validation where users data is stored using MongoDB as database in backend.
- <https://www.nitishdecoder.tech>

- **RECIPE FINDER**

- React app where user searches for a food, which is stored as state using hooks.
- Specific recipe's are rendered using Fetch API request.
- <https://recipe-nitishmatiyara.vercel.app>

- **PATIENT RECORD**

- Developed CRUD app with React-Firebase combination, where patients records are maintained.
- Incorporated React-Router for routing to different paths without page reload thus created single page application.
- Used Firebase Firestore as the database to save records & for handling queries from frontend.
- Extensive use of react-bootstrap for ui & styling.
- <https://patientrecord.vercel.app>

- **CHAT-IN**

- Basic app allowing multiple users to chat real-time.
- Client side UI is minimal with html, css while Server built on nodejs, uses socket.io for communicating with client & both hosted on different platforms.
